Special caps for oil sump

- Special caps for modified oil sump in zinc and aluminum.
- Product Factory can be used on cars, trucks, commercial vehicles and earth moving according to the measures.
- Special caps with inner opening screw: you empty the tank without having to remove the cap.
- The replacement of these caps in the cups oil allows, in later use, to empty the tank without having to remove the cap risking damaging the hole, having to expand, and redo thread with saving time.
- All the plugs have a pitch of 1.5.
