	Safety Data	a Sheet	
Accord	ling to Annex II to REACH		
SECTION 1. Identification of the subs	stance/mixture ar	nd of the company/under	taking
1.1. Product identifier Code:	411 00 15235-2875		
Product name	WATER BASED WELD	DING SPRAY	
1.2. Relevant identified uses of the substance or m		d against	
Intended use Anti-adhesive for aero	osol weiding sprays		
1.3. Details of the supplier of the safety data sheet			
Name	Meccanocar Italia S.r.I		
Full address District and Country	Via San Francesco, 22 56033 Capannoli (PI)	2	
District and Country	Italy		
	- Tel. +39 0587 609433		
	Fax +39 0587 607145		
e-mail address of the competent person			
responsible for the Safety Data Sheet	moreno.meini@mecca	anocar it	
1.4. Emergency telephone number			
For urgent inquiries refer to	National Poisons Infor	rmation Service: +44 121 507 4123	6
SECTION 2. Hazards identification			
2.1. Classification of the substance or mixture			
The product is classified as hazardous pursuant to the	e provisions set forth in	(EC) Regulation 1272/2008 (CLP)	(and subsequent amendments and
supplements). The product thus requires a safety datash Any additional information concerning the risks for health	eet that complies with th	he provisions of (EU) Regulation 201	5/830.
Any additional mormation concerning the fisks for health	and/or the environment	tare given in sections 11 and 12 of t	nis sneet.
Hazard classification and indication:			
Aerosol, category 1	H222	Extremely flammable aeros	ol.
	H229	Pressurised container: may	burst if heated.
2.2. Label elements			
		and the state and successful and the	
Hazard labelling pursuant to EC Regulation 1272/2008 (	ULP) and subsequent an	nenuments and supplements.	
Hazard pictograms:

The product is an aerosol containing propellants. For the purposes of calculation of the health hazards, propellants are not considered (unless they have health hazards). The percentages indicated are inclusive of the propellants.

Percentage of propellants: 24,00 %

# WATER BASED WELDING SPRAY

Revision nr. 2

Dated 12/02/2020 Printed on 12/02/2020

## Page n. 3/15

Replaced revision:1 (Dated: 13/12/2019)

### **SECTION 4. First aid measures**

#### 4.1. Description of first aid measures

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. If problem persists, seek medical advice.

SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention immediately. Wash contaminated clothing before using it again.

INHALATION: Remove to open air. If the subject stops breathing, administer artificial respiration. Get medical advice/attention immediately. INGESTION: Get medical advice/attention immediately. Do not induce vomiting. Do not administer anything not explicitly authorised by a doctor.

#### 4.2. Most important symptoms and effects, both acute and delayed

Specific information on symptoms and effects caused by the product are unknown.

#### 4.3. Indication of any immediate medical attention and special treatment needed

Information not available

## **SECTION 5. Firefighting measures**

#### 5.1. Extinguishing media

SUITABLE EXTINGUISHING EQUIPMENT The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray. UNSUITABLE EXTINGUISHING EQUIPMENT None in particular.

#### 5.2. Special hazards arising from the substance or mixture

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE If overheated, aerosol cans can deform, explode and be propelled considerable distances. Put a protective helmet on before approaching the fire. Do not breathe combustion products.

#### 5.3. Advice for firefighters

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

### **SECTION 6.** Accidental release measures

#### 6.1. Personal precautions, protective equipment and emergency procedures

Eliminate all sources of ignition (cigarettes, flames, sparks, etc.) from the leakage site. Send away individuals who are not suitably equipped. Wear protective gloves / protective clothing / eye protection / face protection.

#### 6.2. Environmental precautions

Do not disperse in the environment.

## WATER BASED WELDING SPRAY

Revision nr. 2 Dated 12/02/2020 Printed on 12/02/2020

Page n. 4/15 Replaced revision:1 (Dated: 13/12/2019)

#### 6.3. Methods and material for containment and cleaning up

Use inert absorbent material to soak up leaked product. Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

#### 6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

## **SECTION 7. Handling and storage**

#### 7.1. Precautions for safe handling

Avoid bunching of electrostatic charges. Do not spray on flames or incandescent bodies. Vapours may catch fire and an explosion may occur; vapour accumulation is therefore to be avoided by leaving windows and doors open and ensuring good cross ventilation. Do not eat, drink or smoke during use. Do not breathe spray.

#### 7.2. Conditions for safe storage, including any incompatibilities

Store in a place where adequate ventilation is ensured, away from direct sunlight at a temperature below 50°C / 122°F, away from any combustion sources.

#### 7.3. Specific end use(s)

Information not available

#### **SECTION 8. Exposure controls/personal protection**

#### 8.1. Control parameters

(C) = CEILING ; INHAL = Inhalable Fraction ; RESP = Respirable Fraction ; THORA = Thoracic Fraction.

VND = hazard identified but no DNEL/PNEC available ; NEA = no exposure expected ; NPI = no hazard identified.

#### 8.2. Exposure controls

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.

HAND PROTECTION None required.

#### SKIN PROTECTION

Wear category I professional long-sleeved overalls and safety footwear (see Regulation 2016/425 and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

#### EYE PROTECTION

Wear airtight protective goggles (see standard EN 166).

#### RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, a mask with a type AX filter combined with a type P filter should be worn (see standard EN 14387). Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold

values considered. The protection provided by masks is in any case limited.

#### ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

#### SODIUM NITRITE

Chemical resistant protective gloves (EN 374) Suitable materials also with prolonged direct contact (Recommended: protection index 6, corresponding to> 480 minutes of permeation time according to

EN 374):

polyvinyl chloride (PVC) - coating thickness 0.7 mm nitrile rubber (NBR) - coating thickness of 0.4 mm chloroprene rubber (CR) - coating thickness 0.5 mm

Additional note: specifications are based on tests, literature data and information from glove manufacturers or derive from similar substances by analogy. Due to many conditions (eg temperature), it should be considered that the practical use of a chemical protective glove in practice can be much shorter than the breakthrough time determined through testing.

The manufacturer's instructions for use must be observed due to the wide variety of types.

## **SECTION 9.** Physical and chemical properties

#### 9.1. Information on basic physical and chemical properties

Appearance	aerosol
Colour	colourless
Odour	characteristic of solvent
Odour threshold	Not available
pH	Not available
Melting point / freezing point	Not available
Initial boiling point	Not available
Boiling range	Not available
Flash point	< 0 °C
Evaporation rate	Not available
Flammability (solid, gas)	Not available
Lower inflammability limit	Not available
Upper inflammability limit	Not available
Lower explosive limit	Not available
Upper explosive limit	Not available
Vapour pressure	Not available
Vapour density	Not available
Relative density	0,9
Solubility	soluble in water
Partition coefficient: n-octanol/water	Not available
Auto-ignition temperature	Not available
Decomposition temperature	Not available
Viscosity	Not available
Explosive properties	Not available
Oxidising properties	Not available

9.2. Other information

VOC (Directive 2010/75/EC) :

20,00 % - 180,00 g/litre

### **SECTION 10. Stability and reactivity**

#### 10.1. Reactivity

There are no particular risks of reaction with other substances in normal conditions of use.

# WATER BASED WELDING SPRAY

Revision nr. 2

Dated 12/02/2020

Printed on 12/02/2020 Page n. 7/15

Replaced revision:1 (Dated: 13/12/2019)

#### 10.2. Chemical stability

The product is stable in normal conditions of use and storage.

#### 10.3. Possibility of hazardous reactions

No hazardous reactions are foreseeable in normal conditions of use and storage.

#### METHYL OXIDE DIMETHYLETER

Vapors can form an explosive mixture with air.

#### SODIUM NITRITE

Dangerous reactions in the presence of the mentioned substances to be avoided.

#### 10.4. Conditions to avoid

Avoid overheating.

METHYL OXIDE DIMETHYLETER

Temperatures:> 52 ° C

#### SODIUM NITRITE

Reducing agents, oxidizable substances, ammonium salts, amines, amino compounds, acids

#### 10.5. Incompatible materials

Strong reducing or oxidising agents, strong acids or alkalis, hot material.

METHYL OXIDE DIMETHYLETER

Oxygen, oxidizing agents, acid anhydrides, strong acids, carbon monoxide, acetic anhydride, powdered metals.

#### 10.6. Hazardous decomposition products

METHYL OXIDE DIMETHYLETER

Formaldehyde, carbon dioxide (CO2), carbon monoxide, methanol.

#### SODIUM NITRITE

Thermal decomposition:> 320 ° C nitrogen monoxide, nitrogen dioxide, disodium oxide

#### SODIUM NITRITE

Based on available data and through expert judgment, the substance is not classified in the target organ hazard class for single exposure.

#### STOT - REPEATED EXPOSURE

Does not meet the classification criteria for this hazard class

#### METHYL OXIDE DIMETHYLETER

Based on available data and through expert judgment, the substance is not classified in the target organ toxicity class for prolonged or repeated exposure.

#### SODIUM NITRITE

Based on available data and through expert judgment, the substance is not classified in the target organ hazard class for prolonged or repeated exposure.

#### ASPIRATION HAZARD

Does not meet the classification criteria for this hazard class

### **SECTION 12. Ecological information**

No specific data are available for this product. Handle it according to good working practices. Avoid littering. Do not contaminate soil and waterways. Inform the competent authorities, should the product reach waterways or contaminate soil or vegetation. Please take all the proper measures to reduce harmful effects on aquifers.

#### 12.1. Toxicity

SODIUM NITRITE			
LC50 - for Fish	0,79 mg/l/96h Oncorhynchus mykiss

### METHYL OXIDE DIMETHYLETER

Solubility in water	45600 mg/l
12.3. Bioaccumulative potential	
SODIUM NITRITE	
Partition coefficient: n-octanol/water	-3,7
METHYL OXIDE DIMETHYLETER	
Partition coefficient: n-octanol/water	0,07 Log Kow
12.4. Mobility in soil	
Information not available	
12.5. Results of PBT and vPvB assessment	
On the basis of available data, the product does not contain any	PBT or vPvB in percentage greater than 0,1%.

#### 12.6. Other adverse effects

Information not available

## **SECTION 13. Disposal considerations**

#### 13.1. Waste treatment methods

Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste containing this product should be evaluated according to applicable regulations.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.

Waste transportation may be subject to ADR restrictions.

CONTAMINATED PACKAGING Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

METHYL OXIDE DIMETHYLETER

It can be used after reconditioning. In accordance with local and national regulations. It must be incinerated in a suitable incineration plant in possession of an authorization issued by the competent authorities.

Information not relevant

## **SECTION 15.** Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Seveso Category - Directive 2012/18/EC: P3a

Restrictions relating to the product or contained substances pursuant to Annex XVII to EC Regulation 1907/2006

# WATER BASED WELDING SPRAY

Revision nr. 2

Dated 12/02/2020 Printed on 12/02/2020

Page n. 13/15

Replaced revision:1 (Dated: 13/12/2019)

Product Point

Substances in Candidate List (Art. 59 REACH)

On the basis of available data, the product does not contain any SVHC in percentage greater than 0,1%.

Substances subject to authorisation (Annex XIV REACH)

None

Substances subject to exportation reporting pursuant to (EC) Reg. 649/2012:

40

None

Substances subject to the Rotterdam Convention:

None

Substances subject to the Stockholm Convention:

None

Healthcare controls

Information not available

15.2. Chemical safety assessment

A chemical safety assessment has not been performed for the preparation/for the substances indicated in section 3.

# **SECTION 16. Other information**

Text of hazard (H) indications mentioned in section 2-3 of the sheet:

Flam. Gas 1A	Flammable gas, category 1A	
Aerosol 1	Aerosol, category 1	
Aerosol 3	Aerosol, category 3	
Ox. Sol. 2	Oxidising solid, category 2	
Press. Gas	Pressurised gas	
Acute Tox. 3	Acute toxicity, category 3	
Eye Irrit. 2	Eye irritation, category 2	
Aquatic Acute 1	Hazardous to the aquatic environment, acute toxicity, category 1	
H220	Extremely flammable gas.	
H222	Extremely flammable aerosol.	
H229	Pressurised container: may burst if heated.	
H272	May intensify fire; oxidiser.	
H280	Contains gas under pressure; may burst if heated.	
H301	Toxic if swallowed.
