

meccanocar 411 00 19200-5835-Control black spray

Description

Control paint, fast-drying, acrylic, for the detection of imperfections, pores, irregularities and sanding marks on fillers and putties in the body.

Equipped with adjustable spray head in a fan for a quick convenient application.

The black light is a system that quickly and easily allows you to highlight the parties do not perfectly sanded: imperfections, pores, irregularities and sanding marks.

Use

- Shake the can for at least two minutes since you perceive well the inner spheres. Make spray and check the color obtained.
- Spray a light hand from a distance of about 20-25 cm from the surface to control. The paint can be sanded after 2-3 minutes.
- After use invert the can and spray to clean the valve thoroughly. Removing the product with acetone or nitro.

Physical and chemical properties

General information.

Forme:	Aerosol
Color:	In accordance with the designation of the product
Odour:	Characteristic
Change of state.	
Melting point / Melting range:	Undefined
Boiling point / Boiling range:	Not applicable, because is an aerosol
Flash point:	Not applicable, because is an aerosol
Self ignition:	Not applicable
Danger of explosion:	In use, may form explosive mixture with air/vapor
Flammability limits:	
	Lower: 1,2 Vol %
	Upper: 13,0 Vol %
Vapour tension at 20°C:	8300 hPa
Density at 20°C:	0,79 g/cm ³
Solubility with water:	Little and/or immiscible
VOC (EU):	748,9 g/l

Storage and shelf life

The product has a useful life of more than 10 years when stored properly, with temperatures between +10 and +25 ° C, 60% relative humidity.
