Anti-adhesive smoothing agent for sealants

DESCRIPTION

Ready-to-use release smoothing agent, based on waxes and surfactants. Particularly suitable for the application and construction of windows and doors, it promotes the removal of excess silicone. It also ensures better smoothness and finish of the sealing joint.

CHARACTERISTICS:

- • Odour: pleasant characteristic;
- Color: whitish;
- Contains non-ionic surfactants <5%;
- Contains anionic surfactants <5%;
- Biodegradability >90%;
- Excellent cleaner;

HOW TO USE:

- 1) Shake before use;
- 2) Apply the sealant;
- 3) Spray an even layer of product;
- 4) Remove and smooth the excess sealant with the spatula;

It may be useful to spray a little LS 1000 smoothing agent on the spatula too. Any residues can be removed with a damp cloth.
